From INSIDE Quick Books!

Print typeset quality forms on BLANK paper!

Check Factory v2.x available for: Quick Books

Features:

Checks

One step process prints your checks and MICR encoding at the same time on blank check paper.

Unlimited number of checking accounts at no extra charge (limited version comes with 5 accounts).

Automatic check signing. Up to three graphic signatures may be assigned to each checking account. Each may be assigned a dollar limit above which the signature will no longer print.

Multi-part checks. Each part may be assigned a laser printer paper source bin.

Access to printer resident signature/graphic cartridges or SIMMs is built in to Check Factory.

Assign an optional password to each graphic signature on a check.

Require additional signatures only if the dollar amount of the check is over a certain amount. (Signature line will print only if dollar amount exceeds limit set)

Forms

Print typeset quality forms on blank paper.

Accounts Payable & Payroll Checks
Product, Professional, Service Invoices
Statements

(OVER)

Print W2s on blank paper (except for government required red copy)

Print forms for an unlimited number of companies. Print Multi-part forms with 8

different titles (Original, Customer Copy etc.). Each part may be drawn from an assigned laser printer paper tray(used for printing on different color paper).

Define a price blackout (Packing List blackout) for invoices on any or all parts..

Security

Design an unlimited number of security schemes with flexibility offered by no other product.

99 million levels of security. A user ID and Password is required to access any checking account,

Assign a security range for each checking account.

Example: Account has security range of 1000 to 2000. Only users with a security level

between 1000 and 2000 would have access to the account.

Account password protection. Assign an additional password to EACH checking account (Optional).

Signature Passwords. Assign an additional password to each signature on a check (Optional).

Audit Trail

Creates an optional audit report for any or all checking accounts. Reports activity each time a checking account is accessed. Reports date,

check number, payee amount, time, account, user name etc.

Graphics

Import any bitmap graphic format for logos and signatures. Visually see the graphic on screen.

Scan images directly into Check Factory using a TWAIN compatible scanner.

Printers

Works with Hewlett Packard PCL5+ (HP III, IV, 5, 6, 4000, 5000, 6000)or compatible MICR Laser printers.

Does not work with PCL4 printers (HP Series II), ink jet, bubble jet, or matrix printers.

Each workstation may use a different type of MICR printer. MICR alignment is linked to the printer.

Ability to use a wide variety of MICR printers at one site.

Requires MICR magnetic toner cartridge for printing checks. (Available from Trans-Micro)
